Automation ROI with Smart Conveyance

Smart Conveyance reduces machine development timelines by combining high performance and flexibility with less risk, enabling a faster path to production. Maximized OEE is delivered by high-speed capability, integrated system functions, intuitive downtime recovery, and shuttle data tracking. With the ability to scale and reconfigure, Smart Conveyance also provides the means to adapt to changes in products and markets cost-effectively.

Machine Development

- Reduce Material by up to **5%**
- Reduce Engineering  by up to **12%**
- Reduce Assembly by up to **10%**

Production

-  Availability
 -  Performance
 -  Quality
- Reduce Footprint **>15%**
 - Increase OEE **>5%**
 - Reduce Spare Parts by to **5%**

Scale / Reconfiguration

 Reduce Costs by Utilizing **Integrated Functionality** to limit station reconfiguration costs.

 Implement **Modular Design & Assembly** to Enable Easy Scaling
